Colloids and Surfaces
A: Physicochemical and Engineering Aspects 136 (1998) 337–338

COLLOIDS AND SURFACES A

Contents of Volume 136

Molecular structure and conformation in phospholipid vesicles sterically stabilized by (tri)-block copolymers investigated by multi-nuclear magnetic resonance techniques
K. Kostarelos (Bracknell, UK/London, UK), M. Kipps (Bracknell, UK), T. Tadros (Bracknell, UK/London, UK) and P.F. Luckham (London, UK) 1
Iron speciation in natural organic matter colloids
J. Rose, A. Vilge (Aix-en-Provence, France), G. Olivie-Lauquet (Paris, France), A. Masion, C. Frechou and J.-Y. Bottero (Aix-en-Provence, France) 11
Adsorption studies of polyethers. Part 1. Adsorption onto hydrophobic surfaces
J.A. Shar, T.M. Obey and T. Cosgrove (Bristol, UK) 21
Isentropic compressibility and transport properties of CTAB–alkanol–hydrocarbon–water microemulsion systems
S.K. Mehta and Kawaljit (Chandigarh, India) 35
Location of crude oil resin molecules at an interface—a model system
S.E. Friberg, H. Yang (Potsdam, NY, USA), Ø. Midttun, J. Sjoblom (Bergen, Norway) and P.A. Aikens (Wilmington, DE, USA) 43
The surface and solution chemistry of pyrite flotation with xanthate in the presence of iron ions
C.L. Jiang (Lexington, KY, USA), X.H. Wang (Jacksonville, FL, USA), B.K. Parekh and J.W. Leonard (Lexington, KY, USA) 51
Preparation of binary palladium–vanadium supported catalysts from metal acetylacetonates
C. Neyertz and M. Volpe (Bahia Blanca, Argentina) 63
Effect of NaCl and MIBC–kerosene on bitumen displacement by water on a glass surface
S. Basu, K. Nandakumar and J.H. Masliyah (Edmonton, ALB., Canada) 71
Line tension effect on contact angles: Axisymmetric and cylindrical systems with rough or heterogeneous solid surfaces
A. Marmur (Haifa, Israel) 81
Study of the phosphating treatment of aluminium surfaces: role of the activating process
I. Van Roy, H. Terryn and G. Goeminne (Brussels, Belgium) 89
The micro-structures formed by Ni^{2+}-AOT/cyclohexane/water microemulsions: a light scattering study
T. Hellweg and W. Eimer (Bielefeld, Germany) 97
Role of the physico-chemical environment on ultrafiltration of lysozyme with modified inorganic membrane
D. Lucas, M. Rabiller-Baudry, F. Michel and B. Chaufer (Rennes, France) 109
Electrochemical studies associated with the micellization of dodecyltrimethyl ammonium bromide (DOTAB) in aqueous solutions of ethanol and 1-propanol
H. Gharibi, B.M. Razavizadeh and A.A. Rafati (Tehran, Iran) 123
SDS, Brij58 and CTAB at the dodecane–water interface
S.R. Deshiikan, D. Bush, E. Eschenazi and K.D. Papadopoulos (New Orleans, LA, USA) 133
Kinetic study of the decomposition of hydrogen peroxide catalysed by Co(II) acetylacetonate supported on a silica-propylpiperazine matrix
S.F. Oliveira, J.G.P. Espinola (Paraíba, Brasil), W.E.S. Lemus, A.G. de Souza and C. Airoldi (São Paulo, Brasil) 151
The cholesterization process on lyotropic liquid crystals studied by rheology
M.R. Alcantara and L.C.F. Dias (São Paulo, Brasil) 155

Effect of a cationic dye on the surface free energy of Leacril fabric
M. Espinosa-Jiménez, E. Giménez-Martín and A. Ontiveros-Ortega (Jaén, Spain) 159
Ultrasonic imaging of gravitational separation in emulsions
T.K. Basaran, K. Demetriades and D.J. McClements (Amherst, MA, USA) 169
Pore structures of the thermal decomposition products of δ-FeOOH particles doped with Ni(II), Co(II) and Cu(II)
T. Ishikawa, W. Sakata, A. Yasukawa and K. Kandori (Osaka, Japan) 183
Preliminary results on the electrostatic double-layer force between two surfaces with high surface potentials
R. Raiteri (Genova, Italy/Mainz, Germany), M. Preuss (Mainz, Germany), M. Grattarola (Genova, Italy) and H.-J. Butt (Mainz, Germany) 191
Particle characterization by AC-electrokinetic phenomena. 3. New developments in electrorotational light scattering (ERLS)
B. Prüger, P. Eppmann and J. Gimsa (Berlin, Germany) 199
Contact-angle hysteresis on heterogeneous smooth surfaces: theoretical comparison of the captive bubble and drop methods
A. Marmur (Haifa, Israel) 209
Studies of colloidal interactions using total internal reflection microscopy
D. Haughey and J.C. Earnshaw (Belfast, UK) 217
Direct measurement of the force of adhesion of a single biological cell using an atomic force microscope
W.R. Bowen, N. Hilal, R.W. Lovitt and C.J. Wright (Swansea, UK) 231
Consequences of foreign salt additives on the structure and texture of some metal oxides
A.K.H. Nohman and H.M. Ismail (El-Minia, Egypt) 237
Fractal dimension of microporous carbon on the basis of the Polanyi–Dubinin theory of adsorption. Part 3: Adsorption and adsorption thermodynamics in the micropores of fractal carbons
A.P. Terzyk, P.A. Gauden, G. Rychlicki and R. Wojsz (Torun, Poland) 245
Adsorption of triarm starblock copolymers based on polystyrene, poly(ethylene oxide) and poly(ε-caprolactone) at the solid–solution interface
O. Lambert, A. Jada and P. Dumas (Mulhouse, France) 263
Solubilization of liposomes modelling the stratum corneum lipid composition by betaine-type zwitterionic surfactants
A. de la Maza, L. Coderch, O. Lopez and J.L. Parra (Barcelona, Spain) 273
Self-assembly properties of polyphenylsulphonic acids and their alkali metal salts in aqueous solutions
J. Czapkiewicz (Kraków, Poland), J.L. del Castillo (Santiago de Compostela, Spain), P. Milart (Kraków, Poland), J.R. Rodriguez (Santiago de Compostela, Spain) and B. Tutaj (Kraków, Poland) 281
Comparative structural study of aqueous fluorinated non-ionic micelles
C. El Moujahid, J.C. Ravey, V. Schmitt and M.J. Stébé (Nancy, France) 289
The effect of complex-forming agent (EDTA) on the exchange of manganese ions on calcium-montmorillonite. I. Reaction scheme and calcium-montmorillonite–Na_2EDTA system
J. Kónya and N.M. Nagy (Debrecen, Hungary) 299
The effect of complex-forming agent (EDTA) on the exchange of manganese ions on calcium-montmorillonite. II. Calcium–montmorillonite–$Mn(ClO_4)_2$–Na_2EDTA system
J. Kónya, N.M. Nagy, R. Király and J. Gelencsér (Debrecen, Hungary) 311
Association of one-component mobile adsorbate molecules on energetically homogeneous solid adsorbent
J.K. Garbacz (Bydgoszcz, Poland) 321

Brief communication
Contribution to the thermodynamics of bis (8-hydroxyquinolinate) chelate complex of copper(II) in the two-phase water–nitrobenzene extraction system
E. Makrlík and Petr Vaňura (Prague, Czech Republic) 329
